Darius Frank

Identity & Access Management · Cloud Security · Security Operations
Denver Metro Area, CO | DARFRA77@GMAIL.COM | dfrank-iam.com | github.com/Dfrank77

Professional Summary

IAM-focused security professional with production experience in Microsoft Entra ID, Active Directory, Duo, and incident response. Contributor to Maester, an open-source Microsoft 365 security project, and builder of Entra ID security tooling. Preparing for SC-300.

Certifications

CompTIA Security+ • SC-300: Microsoft Identity and Access Administrator (In Progress)

Technical Skills

- **IAM:** Microsoft Entra ID, Active Directory, Duo, Okta, Conditional Access, SSO, MFA, RBAC, JML
- **IGA / PAM:** Entra PIM, Just-In-Time Elevation, Access Packages, Access Reviews
- **Security Operations:** Cisco EDR, Sumo Logic SIEM, Umbrella, NinjaOne, KnowBe4, ConnectWise, incident response, log analysis
- **Automation:** PowerShell, Python, Terraform, Microsoft Graph API, Azure Resource Manager (ARM)

Experience

Information Security Specialist (Contractor) | **Technology Group Solutions (TGS)** | **Dec. 2023 – Feb. 2025**

- Performed daily incident response on the internal environment: morning sweeps of Cisco EDR, Sumo Logic, Umbrella, and KnowBe4, investigating alerts with VirusTotal, Any.run, and urlscan.io, tracing root cause past initial quarantine, and escalating when needed
- Assisted with Joiner-Mover-Leaver (JML) tasks in Entra ID and Duo, supporting the IT lead who handled most provisioning
- Helped enforce existing Conditional Access policies for MFA and device compliance
- Supported SOC 2 and CMMC compliance through evidence collection and security control validation
- Generalist on a 3-person team, assisting across IT, networking, and security

Independent Projects

Maester (open-source Microsoft 365 / Entra ID security project) | Contributor | Oct. 2026 – Present

- Contributed security checks to Maester, an open-source tool that audits Microsoft 365 and Entra ID settings; 6 merged by the maintainer.
- Added checks that flag Microsoft-managed Conditional Access policies still in report-only, and that catch AI agent users holding PIM-eligible admin roles

Microsoft Identity Lab & Tooling (self-directed) | Feb. 2025 – Present

- Built open-source Python and Terraform tools that audit Entra ID through Microsoft Graph, including a Conditional Access audit against the CIS Microsoft 365 Benchmark
- Built scanners for privilege escalation (nested groups and PIM-eligible roles that reach Global Admin) and workload identity risk (expiring credentials, orphaned apps, over-privileged grants)
- Built a Terraform module that seeds a lab tenant with about 580 users, 60 groups, and 72 applications to test the tooling at realistic scale
- Found and responsibly disclosed a live ClickFix infostealer attack on a compromised website; published a case study on it

Additional Experience

Hospitality Industry — Leadership Roles (15+ years) Front-line and management roles at upscale hotels and restaurants. Communication, cross-functional coordination, and structured problem-solving skills are directly applied to security operations and incident response. Transitioned to cybersecurity in 2023.
