Darius Frank

Identity & Access Management · Cloud Security · Security Operations
Denver Metro Area, CO | DARFRA77@GMAIL.COM | dfrank-iam.com | github.com/Dfrank77

Professional Summary

IT and security professional with hands-on incident response and identity experience in Microsoft 365, Entra ID, and Duo. Experienced in executing user lifecycle tasks, processing day-to-day access updates, and monitoring endpoint compliance. Security+, preparing for SC-300.

Certifications

CompTIA Security+ • SC-300: Microsoft Identity and Access Administrator (In Progress)

Technical Skills

- **Identity Support:** Assisting with Joiner-Mover-Leaver (JML) tasks, processing account setups, handling MFA/Duo onboarding, and updating user group assignments
- **Access Monitoring:** Verifying existing Conditional Access policy compliance, tracking device registrations, and reviewing basic identity alerts
- **Scripting & Labs (Non-Employment):** Writing basic Python scripts for Graph API lookups, executing routine PowerShell commands, and configuring lab tenants via Terraform

Open Source & Technical Projects (Self-Directed)

Maester (open-source Microsoft 365 / Entra ID security project) | Contributor | Oct. 2026 – Present

- Contributed security checks to Maester, an open-source tool that audits Microsoft 365 and Entra ID settings; **6 merged** by the maintainer.
- Added checks that flag Microsoft-managed Conditional Access policies still in report-only, and that catch AI agent users holding PIM-eligible admin roles

Microsoft Identity Lab & Tooling (dfrank-iam.com) | Builder / Developer | Feb. 2025 – Present

- Built open-source Python and Terraform tools auditing Entra ID via Graph API, including a CIS Microsoft 365 Benchmark audit.
- Coded scanners detecting privilege escalation paths (nested groups/PIM) and workload risks (stale credentials, over-privileged apps).
- Built a Terraform module seeding a multi-tenant architecture with 580 users, 60 groups, and 72 applications across two synchronized tenants to stress-test tooling and cross-tenant sync boundaries.
- Found and responsibly disclosed a live ClickFix infostealer attack on a compromised website; published a detailed case study.

Experience

Information Security Specialist (Contractor) | **Technology Group Solutions (TGS) | Dec. 2023 – Feb. 2025**

- Performed daily incident response on the internal environment: morning sweeps of Cisco EDR, Sumo Logic, Umbrella, and KnowBe4, investigating alerts with VirusTotal, Any.run, and urlscan.io, tracing root cause past initial quarantine, and escalating when needed
- Assisted with Joiner-Mover-Leaver (JML) tasks in Entra ID and Duo, supporting the IT lead who handled most provisioning
- Helped enforce existing Conditional Access policies for MFA and device compliance
- Supported SOC 2 and CMMC compliance through evidence collection and security control validation
- Generalist on a 3-person team, assisting across IT, networking, and security

Additional Experience

Hospitality Industry — Leadership Roles (15+ years) Front-line and management roles at upscale hotels and restaurants. Communication, cross-functional coordination, and structured problem-solving skills are directly applied to security operations and incident response. Transitioned to cybersecurity in 2023.
